Sir:

The following preliminary amendments and remarks are respectfully submitted in connection with the above-identified application.

IN THE CLAIMS:

Please add the following claims:

--16. A process for producing a rubbery polymer having a high modification ratio through reaction of a diene polymer having an active end and a modifier, comprising the steps of:

reacting impurities contained in a monomer and a solvent with an organic metal compound to inactivate the impurities;

feeding the monomer and solvent into a polymerization reactor;

and

carrying out polymerization.--
